Appointments

- 2016– **Postdoctoral Research Associate**, University of Edinburgh
Topographic analysis and landslide modelling software.
- 2016 **Research Assistant**, Cardiff University
-

Education

- 2013–2016 **Ph.D. in Global Change** University of Edinburgh
Uncovering signatures of geomorphic process through high resolution topography.
Supervisors: Dr Simon M Mudd and Dr Tristram C Hales (Cardiff University)
- 2011–2012 **M.Sc. in Geographical Information Science** (Distinction) University of Edinburgh
Thesis Title: *An automated analysis of the southern San Andreas Fault to explore topography's relationship with tectonics.*
Supervisor: Dr Simon M Mudd
- 2007–2011 **B.Sc. (Hons.) in Geology and Physical Geography** (2:1) University of Edinburgh
Thesis Title: *The Influence of Climate Change on Landslide Sediment Yields in the Northern Lake District.*
-

Research Statement

My research aims to develop an understanding of how sediment transport processes are reflected in landscape morphology, and in particular how sediment is transported from hill-slopes into channels. The mechanisms of this transport range from the motion of individual particles through to large scale slope failures and debris flows. In particular, the variability of steady state landscapes is poorly understood and with high resolution topographic analysis I aim to bridge the gap between models and reality and identify topographic signatures of local scale sediment transport processes, which converge to shape landforms at scales beyond their initial region of influence. I am also working to link forest growth models to shallow landslide hazard, to better understand slope stability in locations where forests are rapidly changing, in many cases due to human impacts.

I conduct such research through the development of open source software which facilitates reproducible topographic analysis, with a particular focus on the processing of high resolution topographic data. Such software allows repeatable experiments to be performed on both terrestrial and Martian landscapes, at a range of scales spanning individual hillslopes to continental scale features. I am also interested in the application of cutting edge GIS and computer science techniques to enhance surface process research, through the analysis of complex spatial information combined with novel data collection approaches.

Teaching Statement

My teaching, as with my research, focuses on the implementation and application of quantitative and computational methods, as a framework to understand Earth surface processes. I am passionate about engaging students to interpret landscapes and the processes which act upon them both in a classroom and field setting. I have experience of teaching theoretical and applied GIS, either within the context of physical geography or a number of other disciplines (transport planning, infrastructure, crime research, archaeology) at both an undergraduate and postgraduate level. Aside from teaching physical geography and GIS, I also enjoy teaching scientific programming to students, giving them a grounding in data analysis and visualisation which can be employed throughout their time in education and beyond. Such skills are vital for students and I believe I am well placed to teach these skills within a physical science context.

Technical Skills

Accomplished programmer comfortable with object orientated concepts and a range of languages (**C++**, **Python**, **Java**, **Visual Basic**, **Perl**) and the use of version control (**git**, **subversion**) to manage large projects. Extensive experience in desktop (**ArcGIS**, **FME**, **Whitebox**, **QGIS**) and web based (**MapBox**, **Mapguide**) GIS to solve complex spatial problems. Managing large spatial and non-spatial datasets using SQL databases (**Oracle**, **PostgreSQL**, **MySQL**, **SQLite**). Processing raw LiDAR point clouds to produce bare earth DEMs.

Other Employment

2015–2016 **GIS Consultant and Field Course Leader**, GeoBus, University of St Andrews
2012–2013 **GIS Trainee** Forth Crossing Bridge Constructors

Publications

Conference Presentations

INVITED TALK

- 2015 **Grieve, S.W.D.**, *Reproducible geographic analysis: Insights from geomorphology*. Presented at GIS Update, Edinburgh.

ORAL PRESENTATIONS

- 2015 **Grieve, S.W.D.**, Mudd, S.M., Hurst, M.D., *Constraining hillslope sediment flux using high resolution topographic data*. Presented at the BSG Annual General Meeting, Southampton.
- 2015 Clubb, F.J., Mudd, S.M., Attal, M., Milodowski, D.T., **Grieve, S.W.D.**, *The Relationship between Drainage Density, Erosion Rate, and Hilltop Curvature: Implications for Sediment Transport Processes*. Presented at the BSG Annual General Meeting, Southampton.

POSTER PRESENTATIONS

- 2016 Mudd, S.M., Hurst, M.D., **Grieve, S.W.D.**, Milodowski, D.T., Clubb, F.J., Attal, M. *Detecting geomorphic processes and change with high resolution topographic data*. Presented at the EGU General Assembly, Vienna.
- 2015 Mudd, S.M., **Grieve, S.W.D.**, Milodowski, D.T., Hurst, M.D., Clubb, F.J., Valters, D.A., *LSD-TopoToolBox: Open source geomorphology*. Presented at the BSG Annual General Meeting, Southampton.
- 2015 Clubb, F.J., Mudd, S.M., Attal, M., Milodowski, D.T., **Grieve, S.W.D.**, *The Relationship between Drainage Density, Erosion Rate, and Hilltop Curvature: Implications for Sediment Transport Processes*. Presented at the AGU Fall Meeting, San Francisco.
- 2015 Parker, R.N., Hales, T.C., Mudd, S.M., **Grieve, S.W.D.**, *Precipitation and soil accumulation history modifies future landslide hazard*. Presented at the AGU Fall Meeting, San Francisco.
- 2015 Parker, R.N., Hales, T.C., Mudd, S.M., **Grieve, S.W.D.**, *Climate change has limited impact on soil-mantled landsliding*. Presented at the EGU General Assembly, Vienna.
- 2014 **Grieve, S.W.D.**, Mudd, S.M., Hales, T.C., *How long is a hillslope?* Presented at the AGU Fall Meeting, San Francisco.
- 2014 Mudd, S.M., Attal, M., Milodowski, D.T., **Grieve, S.W.D.**, Valters, D.A., *A statistical technique for identifying channels of different steepness in transient landscapes*. Presented at the EGU General Assembly, Vienna.

Classroom Teaching Experience (Course Level)

- 2016 Quantitative Methods in Earth Sciences, Laboratory Demonstrator (3rd year)
- 2015 Geomorphology, Laboratory Demonstrator and Tutor (2nd year)
- 2014–2015 Object Oriented Software Engineering Principles, Laboratory Demonstrator (M.Sc.)
- 2014–2015 Object Oriented Software Engineering: Spatial Algorithms, Laboratory Demonstrator (M.Sc.)
- 2014–2015 Principles of Geographical Information Science, Laboratory Demonstrator (M.Sc.)
- 2014–2015 Introduction To Spatial Analysis, Laboratory Demonstrator (M.Sc.)
- 2014–2015 Distributed GIS, Laboratory Demonstrator (M.Sc.)

2014–2015	Spatial Modelling, Laboratory Demonstrator (M.Sc.)
2014	Earth Surface Systems Course Assistant (1st year)
2014	Fundamental Methods in Geography, Laboratory and Field Demonstrator (2nd year)
2013–2016	Geo-Visualisation, Laboratory Demonstrator (M.Sc.)
2013–2015	Advanced Spatial Database Methods, Laboratory Demonstrator (M.Sc.)
2013–2015	Further Spatial Analysis, Laboratory Demonstrator (M.Sc.)
2013–2014	Earth Surface Systems, Laboratory Demonstrator and Tutor (1st year)

Field Teaching Experience (Course Level)

2014–2015	Cyprus field course (4th year honours)
2014	Fundamental Field Methods in Geography (2nd year)

Service

2016–	Reviewer: Earth Surface Processes and Landforms.
2015	Currency Reviewer: Reference Module in Earth Systems and Environmental Sciences, Elsevier.
2014–2015	Session Chair M.Sc. GIS postgraduate conference, University of Edinburgh.

Funding Received

2014	British Society for Geomorphology Student Travel Grant Award: £750
2014	NERC Cosmogenic Isotope Analysis Facility: <i>Hillslope-channel coupling in a steady-state landscape</i> . P.I.: Tristram Hales (Cardiff University) Co. I. Simon M. Mudd, Robert Parker (Cardiff University) and Stuart W. D. Grieve. Award: £19,320
2013	Safe Software Grant Program Award: Software licence for FME Desktop Edition
2011	SAAS Postgraduate Students' Allowances Scheme Award: £3400
2011	University of Edinburgh Postgraduate Bursary Award: £1300

Professional Memberships

2014–	American Geophysical Union
2014–	British Society for Geomorphology
